

The Chair

(a poem)

See that thing
over there?
That, my friend,
is a chair

It might be made
out of wood
It has four legs
like it should.

It is there for
moments such
you don't feel like standing
very much.

At the table
while you eat
use your chair
take a seat!

At the office
working fast
your chair is there to
make your feet last.

While at school
learning stuff
your chair will keep you
comfortable enough.

But the best thing
about a chair
it's made to hold
your derrière.
